

## A Fast, Elegant PeopleSoft Experience Inside Your Campus App

Using Modo's turnkey integration with Oracle's PeopleSoft Campus solution, you can provide students and faculty with a fast, elegant PeopleSoft experience directly within Modo-powered campus app.

Drive students' success with easy access to class schedules, registration status, grades, advisor information, financial transactions and more.

Eliminate the need to download a separate application or navigate legacy PeopleSoft screens on a smartphone.

Modo's API-based PeopleSoft integration also leverages Modo Campus' built-in theming, accessibility, and deep-linking to other app content, ensuring that your PeopleSoft experience is a seamless addition to your holistic campus app. It also captures and preserves the detailed business logic you've already built.

PeopleSoft

Suzanne Norton

100

"The University of Akron has leveraged Modo's technology to integrate our student class schedules directly with our campus app. Even as students race across campus to get to their next class, the app shows them their schedule, instructor contact information, the class's location, and even includes GPS-enabled walking directions. The combination of these tools allows students to have the information they need right at their fingertips whenever they need it."

## Why Use Modo to Power a Modern PeopleSoft Experience

In addition to a seamless experience and easy-to-use UI, Modo's PeopleSoft integration provides a 3X performance improvement over other API-based PeopleSoft integrations. The experience can easily be extended to desktop users, too. Be up and running quickly with out-of-the-box ready modules and customizable templates.
